

CIGRE 2023 Sendai Colloquium

- *Recent Overhead Transmission Line Technologies
and Environmental Measures-*

Call for sponsors

CIGRE 2023 Sendai Colloquium
Organizing Committee
Ver.1

Greetings

We are pleased to inform you that the CIGRE 2023 Sendai Colloquium will be held at the Sendai International Center (Sendai, Japan) from October 3 to October 7, 2023.

This colloquium is organized by the Study Committee (SC) of CIGRE, an international organization, and is held every two years. The colloquium is a meeting for the presentation of CIGRE papers.

The colloquium is organized under the general theme of “Recent Overhead Transmission Line Technologies and Environmental Measures” and is based on the preferential subjects of “Sustainable OHL, Environment and Planning”, “Reliability of OHL, Advanced Construction and Maintenance”, “Resilience of OHL, Recent Technologies for Disaster Recovery”, from SCB2 (Overhead Lines), SCC3 (Power System Environmental Performance) , SCC4 (Power System Technical Performance). Over the three days, many papers will be presented in two tutorials and seven sessions. Social programs including receptions, technical tours, and companion tours are also planned to contribute to international exchange.

Although the end of the COVID-19 is not in sight at this writing, we will proceed with preparations based on holding the conference on-site, and through the CIGRE 2023 Sendai Colloquium, we hope to develop opportunities to deepen information exchange and academic exchange with everyone concerned and to contribute to the development of power technology around the world.

We hope that you will take note of the purpose and significance of this meeting, and we would be grateful for your support.

We sincerely wish your company's continued growth and success in the future.

Sincerely yours,
August, 2022

CIGRE 2023 Sendai Colloquium Organizing Committee
Chair Yuko Kuranari
